Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 4,717,184 to Boyce.

Boyce discloses a cabinet having a frame (46), a front face (12) mounted on the frame and defining an opening (50) having a front-to-back depth (figure 2), a drawer (20) mounted on the frame and movable in a front-to-back direction through the opening, the drawer including left and right side panels and a bottom panel, a safety latch (10) including an L-shaped body (figure 2), having a vertical leg (14), mounted on one of the side panels, a horizontal leg (24) projecting from the vertical leg, and a horizontal engaging arm (28) projecting forward from the horizontal leg and having a top surface which defines forward (32) and rear ramps (34) and a trough (30) between the ramps, the trough having a front-to-back distance that is at least as deep as the front-to-back depth of the front face (figure 3), and wherein the forward ramp tapers from a lower elevation in front to a higher elevation in back, and the rear ramp tapers from a higher elevation in front to a lower elevation in back (figure 2), as in claims 1, 5 and 6.

Boyce also discloses the latch being a unitary piece (figure 1), and the engaging arm is movable up and down parallel to the vertical leg by flexing between the engaging

Art Unit: 3676

arm and the horizontal leg (figures 2-4), as in claims 2 and 7, and fastening means (22) on the vertical leg for securing the vertical leg to the inside of a drawer, as in claim 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Boyce, as applied above, in view of U.S. Patent Number 5,445,451 to Harmony.

Boyce discloses the invention substantially as claimed. However, Boyce does not disclose the fastening means being an adhesive strip. Harmony teaches of fastening means being either an adhesive strip or screws (22, 114; column 2, lines 43-49) in the same field of endeavor for the purpose of securing a latch to drawer front. It would have been obvious to one with ordinary skill in the art at the time the invention was made to replace screws with adhesive strips in order to secure the latch to the drawer.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to drawer latches:

Art Unit: 3676

U.S. Patent Number 6,042,157 to Shimotsu, U.S. Patent Number 4,560,212 to Papp et al., U.S. Patent Number 4,549,773 to Papp et al., U.S. Patent Number 4,378,948 to Chrones, U.S. Patent Number 3,971,237 to Rasmussen, U.S. Patent Number 3,841,518 to Hines, U.S. Patent Number 3,522,963 to Farnden, U.S. Patent Number 1,241,192 to Bruder.
